

ZyLAB Software-as-a-Service (SaaS)

As an alternative to the traditional software licensing and installation model, ZyLAB systems may also be delivered via the Internet in a software-as-a-service (SaaS) model. For one predictable monthly subscription fee, you gain unlimited access to the ZyLAB technology you need—whether it is eDiscovery & Legal Production; Digital Archiving for Records Management, Compliance and Litigation Readiness; or any of our other modular systems for information management.

KEY ADVANTAGES

- Central archiving, sharing and searching of documents
- Secure, reliable, and convenient anytime-anywhere access to information
- Easy scalability with expanding volumes of data
- Simple and immediate implementation
- Always the latest version of ZyLAB software
- Less IT administration required
- Access to ZyLAB technical support and professional services
- Lower-cost alternative with one low monthly fee

“ZyLAB offers our clients, commercial and Federal alike, one of the most comprehensive solutions on the market.”

~ Allan Kalkstein, Vice President and General Manager, Legal Information Management Service's Group, Lockheed Martin Aspen Systems

“ZyLAB offered us the most comprehensive solution. Other companies had specific parts of what we wanted, but nobody was able to put together everything we needed like ZyLAB.”

~ Donna Baur, Records Manager & Deputy Town Clerk, Town of Jackson, Wyoming

“ZyLAB worked with us to create a system that exceeded our original vision and expectations.”

~ Carol Ditzler, Head of Collection Services, US National Agriculture Library

Sophisticated Software Delivered in a Simple Package

The “cloud-based” ZyLAB solution provides you with reliable, on-demand access to your information as well as tools to archive, search, manage and retrieve your documents from anywhere. Our SaaS clients receive the same sophisticated technology as our installed, on-premise deployments, and the end-user experience is identical.

Best of all, ZyLAB SaaS solutions do not require users to purchase new hardware and software, IT departments are spared the hassle of installing and supporting more software internally, and the application and system administration duties are handled by ZyLAB technicians. Additionally, ZyLAB SaaS clients can begin using the technology to manage their information almost overnight, making it a great way to “audition” our technology, perform a proof-of-concept for a full-scale deployment, or deliver a project-based information management solution.

Your Information Remains Fully Secure

ZyLAB SaaS solutions protect your valuable information from falling into the wrong hands or being accidentally deleted. Your data will reside on our servers, which are housed in a professional datacenter that abides by rigorous security standards, including daily back-ups, virus protection, and onsite surveillance. For detailed information about the security protocol, please inquire with your technical sales engineer or our professional services team.

A Solution Tailor-Made for You

Regardless of your industry or the size of your company, with ZyLAB SaaS solutions you can easily archive your contracts, project information, files, incoming mail etc. and also have the entire content of this information fully searchable (regardless of the format: digitized paper, electronic files, email and attachments). ZyLAB SaaS users span the legal, healthcare, government, manufacturing, intelligence and financial sectors.

Every client has different challenges and goals, therefore, our SaaS solutions offer optimal flexibility. You can define the scope of the ZyLAB SaaS solution you require, including the modules and the service and support level. Your Service Level Agreement will outline those selections and guarantee the availability of your data, our software, and ongoing maintenance from our professional Service Desk technicians.
